

ARMORY

Bul Armory have been manufacturing and developing firearms since 1990. Our mission statement is to deliver the most reliable, accurate and innovative guns that you can run straight out of the box. Our line of firearms includes self defense EDC pistols for civilians, duty ready platforms for law enforcement and military personal and competition ready firearms for sport shooting. Built by our master gunsmiths with superlative parts and hand fitted to the highest degree, there is a Bul gun for every task in sight.

SAS II BULLESTEROS

After a year long of development with inputs from world champion Jorge Ballesteros, we came up with a new breed of an open gun, the Bullesteros.

The development started with a new stainless steel grip to add weight to the gun and keep recoil down to a minimum. The trigger guard is ergonomically cut to allow for the highest grip possible.

We then fit it with a unique one piece compensated 5.7" hybrid barrel for a fast and flat shooting experience. To top it all off, the Bullesteros ships with a modular trigger system that has interchangeable trigger shoe inserts, a tool less guide rod, CNC machined & spring loaded ncompetition extractor, shielded ambidextrous safeties and is hand built with the highest attention to detail.

JORGE
BALLESTEROS

- Calibers: 9mm / 9X21 / .38 super .
 - Barrel: Match grade one-piece 5.7" inch hybrid compensated ramped bull barrel.
 - Finish: Stainless steel / black stainless steel.
 - Frame: Full length dust cover.
 - Slide: Lightened ported slide.
 - Trigger: up to 2.0 lbs.
 - Safety: Ambidextrous shielded extended levers.
 - Sights: Nikko Stirling 6 MOA red dot sight.
- (Mount is compatible with C-More RTS2 & Vortex Razor)

- Integrated thumb rest on the mount.
- Large adjustable magazine release.
- Magazines: 2, 170mm.
- Magwell: Enlarged.
- Tool less guide rod.
- Slide racker.
- Weight: 1540 g approx.

SAS II
UR SHORTY

The “Ultimate Racer” (UR) was designed and built for cutting edge competitive performance. The UR pistol incorporates state of the art gunsmithing and manufacturing processes to provide superior speed and accuracy. It’s meticulously hand fitted and tuned, then thoroughly tested to ensure that everything is perfect. The UR is ready to race out of the box, just load the magazines and you are ready to go.
